Players at the table are all dealt a card face up to determine the placement of the button which designates the initial roller. The button also designates the first player to purchase cards during the initial Buy-in round and the Re-buy round with the option to purchase cards rotating clockwise.

The game begins when 2 or more players purchase cards for \$1 each from the dealer. The dealer pitches the cards face up in front of the player. In the event either dice have contact with the rake slot, chip trays, top of rails, dealer shoe, card discard holder or any other foreign object other than cards on the playing surface, the roll will be ruled illegal. The player must roll again until a legal roll is achieved.)

All players with cards matching the roll of the dice continue with all other players being eliminated.
