Bingo Event Instructions

There are also 15 “Hold” tickets that contain a Bunny numbered 1 though 15, inclusive. The Bunny winner (\$200) is determined by the first vertical column (the downline) to be called on the bingo board (e.g., for Bunny 9 to win, the numbers B9, I-24, N-39, G-54 and O-69 would be called prior to any other vertical column being called.) It is only possible for there to be one “downline” winner of the \$200 prize. In the graphic below, Bunny number 9 was the downline winner.

There are also two other downline winners of \$100 each. These winners are the Bunny number one higher than the initial Bunny winner and the Bunny number one lower than the initial Bunny winner. In the example above, Bunny numbers 8 and 10 would each win \$100. If Bunny 1 was the initial downline winner, Bunnies 15 and 2 would be the \$100 winners of the higher and lower Bunny prizes. Similarly, if Bunny 15 was the initial downline winner, Bunnies 14 and 1 would be \$100 winners of the higher and lower Bunny prizes.

There are also a total of 75 bingo ball symbols in each game of Lucky 7 tickets (B1 through O75 inclusive). There are a total of 25 unique tickets within each game, each bearing three different bingo ball symbols. When the first ball is called during the bingo game immediately following the sale of the deal of the tickets, the holder of the ticket that corresponds to that ball will win \$100.
