

BOSTON 5

Prior to each round of play, the dealer will shuffle and cut the cards.

Play begins with the player making an ante bet and a "first wager." The first wager must be exactly double the ante. There is also an optional 3 card bonus bet. The player can not make this bet alone but must play the main game.

The dealer shall deal three cards to each player and to the dealer, all three cards at the same time, face down in a clockwise rotation. If the player made the 3 card bonus bet and has at least a pair then he should show the dealer his cards to receive payment. After reviewing the first three cards the player must decide to either fold or place a "second wager". If the player folds he forfeits his cards and all bets. If the player makes a "second wager" it must be exactly equal to the first wager.

The dealer will then deal to each player still in the game, two more cards. Each hand is individually compared to the dealer's 5-card hand, the highest hand wins.

If the player's hand beats the dealer's hand then the player shall win even money on the first and second wagers, and the ante shall push.

If the dealer's hand beats the player's hand then the player shall lose his first and second wagers and the ante.

If the player's hand and dealer's had are exactly equal in value (highly unlikely) the first and second wagers and the ante shall push.

Regardless of whether the player or dealer has the higher hand the player shall be eligible for a Ante Bonus for hands of two pair or greater, based on the ante bet. Note, that if the player has a bonus hand but loses to the dealer he will still get the bonus but lose the ante bet itself.

BOSTON 5 PAYOUT TABLE
